SOFTWARE CONSULTING

System Optimization

City Wide Mechanical

Dallas, Texas

Project Description

City Wide Mechanical system and processes were not delivering timely, meaningful job and financial information. Owners and executives contacted OnPoint to help them fix the problem.

The Solution

OnPoint completed a system analysis identifying the problem and a plan to resolve.

The Result

System configuration and processes were fixed and training performed so that City Wide Mechanical's staff processed efficiently and the company knew where they stood on projects. Financial statements were generated on a timely basis!

Additionally, during periods of turnover OnPoint provided accounting services so that reports and financials could continue while training new people.

How This Can Apply to Your Company

Ask your Managers and Key Decision Makers if there are problems to solve. When it makes sense, partner with the right Professional Services Company that knows your business, knows the software, and has the right resources to help you fix problems.

These partnerships are key to your success.
